Pacific Structural Steel Conference 2013 Singapore

8 - 11 October 2013 Resorts World Sentosa

Advancements and Achievements in Structural Steel

FIRST CALL FOR PAPERS

HO WAN BOON Chairman

BERNARD CHUNG Secretary General

RICHARD JY LIEW Chairman Scientific Committee

Welcome Message

Singapore Structural Steel Society is honoured to host the 10th Pacific Structural Steel Conference in 2013.

The Pacific Structural Steel Conference is a major initiative bringing together expertise in structural steel research, education and construction from the Pacific Rim and beyond, to promote cooperation among the structural steel associations and communication on the development in this specialised field.

These intellectual exchanges can only be realised with your participation and contribution. We would like to extend a warm welcome to all to celebrate with us.

We look forward to the moment, October 2013, and to welcome you to Singapore.

Ho Wan Boon

Bernard Chung

Anthony Tan Chia Wah Kam Chor How Choon Lee Chee Weye Tan Tian Chong

Richard JY Liew

Ho Wan Boon President, Singapore Structural Steel Society Chairman, Pacific Structural Steel Conference 2013

Advancements and Achievements in Structural Steel

Call for Papers

English will be the official language for both oral and written presentations The Conference Proceedings will be published

To assist in the review of paper submissions, authors are requested to submit an abstract of not more than 250 words online by **31 January 2013**. Upon acceptance of abstract, authors are required to submit their final paper for the Programme and Abstract Book of not more than 2 pages.

Research and Design

- > Architecturally exposed structural steel systems
- > Buckling & stability analyses
- Computational analysis & modeling of steel and composite structures
- > Design and analysis of steel structures
- Design for erection and related construction issues
- Design for robustness and against progressive collapse
- > Design for wind in Pacific Rim countries
- > Experiments & instrumentations
- > Failure analysis of structures
- > Fatigue & fracture
- > Hot and cold formed steel
- > Hybrid and composite construction

- Innovative steel & composite materials and their use in construction
- > Innovative structural systems and elements
- > Joints and connection details
- Life-cycle evaluation and sustainability of structural steel, including global environmental impact
- > Major building projects
- > Major industrial projects
- > Major steel bridge projects
- > Multi-storey buildings & bridges
- Performance-based design concepts and applications
- > Steel design codes and software
- > Vibration, dynamics and seismic design
- > Welded structures

Fabrication

- > Corrosion protection materials and systems
- > New fabrication technology: welding, cutting, etc.
- > Partnering and joint ventures

Erection

- > Construction safety
- Innovative techniques, including automation and robotics
- > Unique projects and their erection schemes

Some refer to Singapore as the "little red dot", but Singapore's presence in the world today is larger than that moniker. In fact, Singapore is a bustling cosmopolitan city that offers a world-class living environment, with its landscape populated by high-rise buildings and gardens. One interesting facet you'll discover about Singapore is a ubiquitous collage of cultures, where people of different ethnicities and beliefs coexist. Besides a vibrant multicultural experience, there's . more you can discover about Singapore.
